Professional Summary

Software Engineering Honours graduate (Deakin University) with a strong foundation in Object-Oriented Programming, relational databases, and SQL. Experienced designing, developing, testing, and implementing business applications end-to-end – from enterprise API integrations to production web apps. Fast, self-directed learner with a track record of diagnosing and fixing bugs, extending existing modules, and documenting solutions for team handover.

Technical Skills

Programming & OOP: Java, Python, JavaScript (ES6+), TypeScript, C/C++, Object-Oriented Design, Adapter/Service design patterns

Databases: SQL, PostgreSQL, relational data modeling, MongoDB (NoSQL fundamentals)

Web Technologies: HTML5, CSS3, React, Next.js, Node.js/Express, REST APIs

Tools & Version Control: Git, GitHub, Docker, Postman, Agile/Scrum

Cloud: AWS (EC2, S3, RDS, Lambda, IAM) – AWS Certified Solutions Architect Associate

Professional Experience

Software Engineering Intern – Middleware API Developer Jul 2025 – Sep 2025
MA Services Group Pty Ltd, Melbourne, Victoria

- Designed and built a Node.js/Express REST API integrating a third-party enterprise security platform, using Object-Oriented Adapter and Service-layer patterns so new modules can be added without changing core logic.
- Diagnosed and fixed integration bugs across authentication, caching, and data-validation layers; added schema validation to prevent recurring defects.
- Documented API endpoints and implementation notes to support team handover and future maintenance.

WordPress Developer & SEO Intern Dec 2023 – Mar 2024
Willify Pty Ltd, Bayswater, Melbourne

- Maintained and extended a live production business website, building custom modules/plugins and diagnosing and fixing front-end and CMS bugs.
- Migrated legacy page templates to updated, structured layouts, improving Core Web Vitals by 20% and search visibility.

Front-end Developer Intern Nov 2022 – Mar 2023
Deakin Launchpad, Burwood, Melbourne

- Built and debugged cross-platform UI in Flutter/Dart (OOP), integrating 10+ REST APIs for real-time data.
- Worked in Agile sprints with Git-based version control and structured problem-solving to resolve defects.

Key Projects

Willify – Full-Stack SaaS Business Application 2025
willify-mu.vercel.app

- Independently designed, developed, tested, and deployed a production SaaS application end-to-end – database schema, OOP-structured backend services, SQL-backed data handling, and one-time payment processing.

Chronic Kidney Disease Prognosis using AI Jul 2023 – Feb 2024
DOI: 10.1016/j.cmpbup.2024.100160

- Built Python data-preprocessing pipelines and classification models; improved F1-score by 8% (accuracy 86%→94%) – demonstrates fast, self-directed learning of a new domain and toolset.

Education

Bachelor of Software Engineering (Honours) 2024
Deakin University, Burwood, Melbourne – WAM: 72.4

Specialisation: Internet of Things (IoT), Robotics, Cyber-Physical Systems

Certifications

- AWS Certified Solutions Architect – Associate (2024)
- AWS Academy Graduate: AWS Academy Cloud Architecting (2023)
